EDUCATION

Delta State University, Abraka | Expected August 2026
Bachelor of Science — Computer Science **CGPA: 3.95 / 5.0**

TECHNICAL SKILLS

Languages & Technologies: HTML, CSS, JavaScript, React.js, Vanilla JS (ES6+)
Web & PWA: Progressive Web Apps (PWA), Service Workers, Web App Manifest, Offline-First Architecture, IndexedDB (client-side storage, Blob handling), Mobile-First Responsive Design, iOS Safari Compatibility
UI/UX & Animation: CSS Keyframe Animations, Screen Slide Transitions, Glassmorphism Design, Component Architecture, Design Systems
Database: MongoDB, IndexedDB
Tools & Version Control: Git, GitHub, Vite, Netlify, Vercel
Design: Graphics Design, UI/UX, Adobe Photoshop, Adobe Illustrator
Productivity: Microsoft Word, Microsoft Excel, Microsoft PowerPoint

PROJECTS

StudentApp: Student Profile Manager PWA

Tech Stack: Vanilla JavaScript, HTML5, CSS3, IndexedDB, PWA (Service Worker + Web Manifest) | **Live URL:** https://student-cruds.netlify.app | Hosted on Netlify

- Built a full-featured student profile management PWA with complete CRUD (Create, Read, Update, Delete) operations installable directly on iOS and Android as a home screen app.
- Implemented IndexedDB for persistent, unlimited client-side storage, storing student photos as raw Blobs, avoiding the 5MB localStorage ceiling and enabling large image uploads with no data loss.
- Engineered an offline-first architecture using a Service Worker and Web App Manifest, the app loads and functions fully without an internet connection after initial install.
- Designed a polished mobile-first UI with smooth CSS keyframe screen slide transitions, a pulsing FAB button, gold scrollbar theming, radial glow effects, and an animated splash screen built entirely without any CSS framework.
- Implemented gold-themed unified scrollbar styling across all screens, eliminating double-scrollbar conflicts through careful overflow and scroll container architecture.
- Deployed to Netlify — publicly accessible and installable as a PWA on any device.

Wizzy Collections: E-Commerce Demo Website

Tech Stack: React.js, Vite, Responsive CSS, JavaScript | **Live URL:** https://wizzy-collections.vercel.app | Hosted on Vercel | GitHub: https://github.com/Wizzy67/wizzy-collections

- Designed and built a full production-ready e-commerce SPA using React.js and Vite, featuring a premium Dark Cyber aesthetic with a deep indigo-violet colour palette.
- Implemented a fully responsive mobile-first layout using a custom useBreakpoint hook — adapting seamlessly across mobile (< 480px), tablet, and desktop viewports.

- Built an interactive cart drawer with quantity controls, a wishlist system, and real-time toast notifications for user feedback.
- Integrated a portfolio splash screen with animated transitions, tech stack display, and a demo disclaimer — designed specifically for CV and portfolio presentation.
- Deployed to Vercel via GitHub CI/CD pipeline — live URL auto-updates on every push to main.

Poet Portfolio Website

Tech Stack: HTML, CSS, JavaScript | **Live URL:** https://prosper-ifeanyi.netlify.app/ | Hosted on Netlify

- Designed and developed a fully responsive multi-page website for a professional poet, showcasing their biography, poems, other writing, and contact information.
- Built an interactive contact form and ensured clean cross-device navigation — deployed on Netlify for public access.

CERTIFICATIONS & TRAINING

Certificate in Web Development & Cybersecurity

Linar School of Media and ICT | Duration: 6 Months

- Completed a 6-month professional training programme covering web development fundamentals and cybersecurity principles.

Certificate in Graphics Design

Linar School of Media and ICT | Duration: 6 Months

- Completed a 6-month professional training programme covering Adobe Photoshop and Adobe Illustrator.

PROFILE

Motivated final-year Computer Science student at Delta State University with a strong academic record (CGPA 3.95). Experienced in building client-facing web applications and Progressive Web Apps using React.js, Vanilla JavaScript, HTML, CSS, IndexedDB, and Service Workers with a keen eye for design and attention to detail. Recently engineered and deployed StudentApp, a full-featured PWA with CRUD operations, offline-first architecture, IndexedDB photo storage, and a polished mobile-first UI installable on iOS and Android. Also built and deployed Wizzy Collections, a full-stack e-commerce demo in React.js featuring responsive design, cart and wishlist functionality, and CI/CD deployment via Vercel. Eager to apply both technical and creative skills in a professional development environment.
